About presentation

Scope:

- RFID credentials

- RFID readers

- Highlevel controller overview

- Integrator and manufacturers mistakes and problems

Out of scope:

- Magnetic tape

- Biometrics

- Plate recognition

- OSDP

- Business logic

Access control system

Card ⇄ Reader ⇄ Controller

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Card (ass grab tech)

Unique ID

- Different length

- Magic cards

Power supply:

- Active

- Passive

Frequency:

- LF (125kHz, 134khz)

- HF (13.56Mhz)

- UHF (300Mhz - 3Ghz) - Mostly for inventory systems, parking and tolls

RFID access

# Powering card - Electromagnetic induction

Current gets induced in one of these cases:

- Conductor moves in constant field

- Conductor is in alternating field

How is this used?

- Sinusoid signal at proper frequency (125kHz for example)

- Resonant antenna

  - Antenna length depends on wavelength (length light travels during one oscilation)

  - Lower frequency, bigger antenna

Powering card showcase

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic
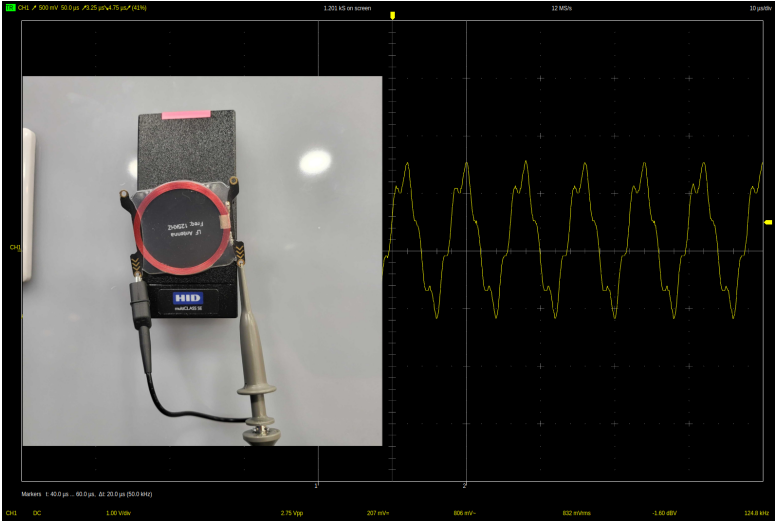

Command modulation - Reader
to card

- Capacitor can be used to store power

- Sine cycles can be skipped, to modulate data (commands)

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Data modulation - Load modulation - Card to reader

- Load on card = Load on power source

- Increase in load = Decrease in voltage

- It can be measured across both antennas

- It can be measured in field (sniffing)

- Switching load on and off can be used for modulation

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Figuring out the frequency

- Flashlight (antennas do not look the same)

- Field detector

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

LF cards

- One-way communication or simple two-way communication

- Slow communication

- Mostly no security features

- Simple implementations
  - Modulation
  - Baudrate
  - Inverted

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

LF card standards

- HID Proxcard

- EM4100

- HiTag

- Indala

. . .

- T5577 can emulate other cards

- ISO 11784 / 11785 Standard - Animal chips

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Vulnerabilities and characteristics

- Trivial to read

- Trivial to clone or emulate

- Requires big antennas for great performance, due to low frequency

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Tools

Tool	Read	Write	Emulate	Note
Proxmark3	Yes	Yes	Yes	Steep learning curve
White cloner	Yes	Yes	No	No display for ID
Blue cloner	Yes	Yes	No	Sets password
Tinylabs Keysy	Yes	Yes	Yes	Closed source
Chameleon Ultra	Yes	Yes	Yes	Only EM4100 right now
Flipper Zero	Yes	Yes	Yes	Great support
ICopyX	Yes	Yes	Yes	Check emulation

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

HF cards

- Two-way communication

- Fast communication

- Very flexible in terms of features

- Quite a few standards, substandards and classes of standards
  implementations

- Some standards support anti-collision

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Vulnerabilities and characteristics

- More advanced modulation techniques

- Proprietary communication protocols

- Sometimes encrypted

- Sometimes programmable (Java SmartCard)

- Readers do not always use proprietary features and sometimes rely on low level stuff like UID)

- Can be cloned, but relies on understandind the tech implemented in a card

- Higher frequency means smaller performant antennas = long range cloning (few 10s of cm)

HF card standards

RF communication: ISO 14443 A, ISO 14443 B, ISO 15693, ISO 18092

Application protocols: ISO 7816 (APDU) over ISO 14443 A/ISO 14443 B, Mifare Classic, Mifare Ultralight, ISO 15693 (NFC-V)

Implementations either extend existing command set or utilize ISO 7816 (APDU) over underlaying protocols.

Tools

Tool	Read	Write	Emulate	Note
Proxmark3	Yes	Yes	Yes	Timing issues fo
Chameleon Mini (Tiny)	Yes	No	Yes	Timing issues fo
Chameleon Ultra	Yes	No	Yes	Still too new
Flipper Zero	Yes	Yes	Yes	Timing issues fo
Long Range Raders	Yes	Yes	Yes	10-20cm
PN532	Yes	Yes	Yes	LibNFC
DL533N	Yes	Yes	Yes	LibNFC

Type of card dependant

Controller
Input signal:

- Wiegand

- OSDP (out of scope)

Output signal:

- Control the relay

- Audiovisual feedback

Wiegand

Wiegand to ID

Wiegand Calculator - 26-bit format

Binary Data

P	F	F	F	F	F	F	F	F	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	C	P
0	0	0	0	0	0	0	0	0	1	1	1	1	0	0	0	1	0	0	1	0	0	0	0	0	1	1

Even Parity Field	Odd Parity Field

Facility Code

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Attacks

- Cloning credentials

- Hardcoded/default credentials

- Fuzzing attacks

- Downgrade attacks

- Crypto or PRNG implementation attacks (for example nested, hardnested and darkside attacks on Crypto1)

- Wiegand sniffing and replay

- Controller and reader combo attacks

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Hardcoded/default credentials

- Some controllers come with default credentials hardcoded

- There are backdoor credentials

- Some of them have been leaked (No security by obscurity)

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Fuzzing attacks

- There have been cases where readers did unlock for some extreme values

- 0x0000000000

- 0xFFFFFFFFFF

RFID access
control
system,
what it is
and how to
defeat it

Nemanja
Nedeljkovic

Controller and reader combo
attacks

- Default password can be used to register new credentials

- Push to unlock button is on the outside

  - Signal wire is connected to VCC using pull up resistor

  - Button connects signal wire to ground

  - When voltage falls below certain value, relay is connected, to unlock

  - Color scheme for wiring is well known

- Relay is on the outside

  - Relay = Electromagnet connected to metal plate and metal plate on spring

  - External magnetic field can activate relay

RFID access
control
system,
what it is
and how to
defeat it
